A knowledgeable and resourceful project leader, business and systems analyst

- Extensive experience in project development, business systems analysis, design, architecture, development, technical support and consultancy. Demonstrated key competencies in several industries including financing, pharmaceutical, automotive, chemical and electrical power generation
- Manages projects from conception to completion with careful planning, execution and follow up, using techniques from the Project Management Institute framework
- A business savvy analyst, solutions provider and consultant with over thirty years of proven experience in both private and public sectors
- Extensive experience with Information Technology and an ability to learn new methodologies and techniques quickly
- Experience with team management, building rapport with users and co-workers and adapting quickly to new environments

Technical Skills

<i>Technology</i>	<i>Expertise</i>
IBM Lotus Domino	Highly Proficient
IBM Websphere, Linux,	Basic
MS SQL, IBM DB2	Intermediate
Lotus Script, Javascript, Java, HTML, IBM Lotus LEI	Highly Proficient
Data Stage, Firewall, Load Balancing, Disaster Recovery	Intermediate
Crystal Reports, HTTP Servers	Intermediate
Microsoft Project, Office & Visio	Highly Proficient
Java, C++	Intermediate
Real-time operating system , programs and SCADA	Highly Proficient

Certifications

- Agile Certified Scrum Master (CSM) - 2013
- Project Management Professional (PMP) – Credential#: 1247974 : 04/06/2009
- Principal Certified Lotus Developer (PCLP) - 1999

Professional Background

Canada

RBC Investors Services (Banking/Financing)
Senior Technical Systems Analyst & Project Manager

2007 ~ 2013

- **Project management:** performs servers and architecture upgrade, server security compliance and business

Pedro Leite PMP, CSM

348 Windermere Avenue, Toronto, On M6S 3L1 **Canada**
Belmiro P. Brandão, 55 Apt. 602 Campina Grande, 58.407-670, PB **Brazil**

requirement upgrades. Manages successful multi-team project implementation to refresh servers, define disaster recovery plans and applications upgrades.
